### *Awake Vinga*

The Awake VINGA eFoil is short but generous in volume, stable but agile, powerful but precise. Which means there's something for everyone. Inexperienced riders can take their first-ever flight on an eFoil with confidence, while the more experienced rider can test their limits by executing the most audacious manoeuvres.

In just a few quick clicks you're ready to fly because no other eFoil is assembled faster than Awake VINGA.

Lift

The LIFT3 boards feature an updated shape for increased maneuverability and ease of use. Combined with the upgraded construction, the new sizes reduce weight and increase toughness making the LIFT3 boards the lightest and strongest eFoil options on the market.

### *Technical Service*

We have a dedicated team of qualified engineers that are able to undertake all mechanical and electrical repairs at our state of the art facilities center here in the Cote d'Azur.

We also have dynamic technicians that can travel throughout Europe to assist and repair products on demand.

### *Storage*

We have large storage facilities located in Biot, close to Port Vauban Antibes that can cater to any of your winter requirements including winterising of your tender and jetski, protective wrapping and battery maintenance charging.

Following this with our services, we can prepare your tenders and toys ready for the start of the season.

### *Wrapping*

Make your toys unique with our wrapping service. Our team will assist you during each step of the process, from the design to the final delivery. The wrapping is sun and water resistant, specifically conceived for the sea environment.

Improve the experience of your guests with their own customised water toys.
